

**VOLUNTARY REMEDIATION PROGRAM  
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

**PROJECT SUMMARY**

**Site Name:** Berry Bearings/Former Service Station

**Applicant's Name:** Genuine Parts Company

**Site Location:** 1612 South Kentucky Avenue  
Evansville  
Vanderburgh County

**VRP Site Number:** 6961202

**Project Manager:** Damon Ridley

**Date Application Received:** December, 1996

**Date Project Completed:** October, 1998

**Project Duration:** 1 year, 10 months

**Contaminant Group(s):** Petroleum

**Media Cleaned Up:** Subsurface Soil, Groundwater

**Cleanup Goals Achieved:** Tier II Nonresidential

**Deed/Land Use Restrictions:** Nonresidential

**Project Description:** The site was formerly a gas station, closed in the early 1970's, which operated with four 2,000-gallon underground storage tanks (USTs), one 550-gallon waste oil tank, and one hydraulic lift. In August of 1995, all tanks and lift equipment were removed.

Samples taken in the pit areas revealed elevated Total Petroleum Hydrocarbon (TPH) levels. Monitoring wells were installed for groundwater sampling and all benzene, toluene, ethylbenzene, and xylene (BTEX) samples were below VRP's Tier II Nonresidential standards. The tank pits were excavated and backfilled with clean fill material.

Sampling results determined that there was no off-site soil or groundwater contamination requiring remediation. Confirmatory sampling demonstrated that BTEX constituent levels were below VRP's Tier II nonresidential standards.
